## Comando Rollback

Dmitriy Eshenko - 2021-07-25 - 0 Comments - in CLI Reference

You can rollback configuration using the **rollback** command, however this command will immediately trigger a system reboot once confirmed. Use the compare command to verify the configuration you want to rollback.

Syntax

```
vyos@vyos-rtr# compare 1
[edit system]
>host-name vyos-1
[edit]
vyos@vyos-rtr# rollback 1
Proceed with reboot? [confirm][y]
Broadcast message from root@vyos-1 (pts/0) (Tue Dec 17 21:07:45
2013):
The system is going down for reboot NOW!
[edit]
vyos@vyos-rtr#
```
