TFTP-Server

Robert Göhler - 2019-02-25 - 0 Comments - in Services

VyOS (1.2.x) provides a TFTP Server functionality.

create an folder for the data to use it in the TFTP Server config

```
set service tftp-server directory /config/user-data/tftpdata/
```

set the listen-address in IPv4 or/and IPv6

```
set service tftp-server listen-address 10.10.1.254
```

set chance the default udp Port

```
set service tftp-server port 6969
```

to allow anonymous uploads

```
set service tftp-server allow-upload
```

Choose your directory location carefully or you will loose the content on image upgrades.

Any directory under /config is save at this will be migrated.
