## Top (command)

Dmitriy Eshenko - 2021-09-21 - 0 Comments - in CLI Reference

The **top** command allows you to navigate to the top-most level of the configuration tree. To get to a single level higher, you can use the **up** command repeatedly. To navigate down in the tree, use the **edit** command.

Syntax

```
[edit interfaces ethernet eth0]
vyos@vyos-rtr# top
[edit]
vyos@vyos-rtr#
```
